Vsando a identidade de sulor para reserver xcn], teremos que xcn] = \(\frac{2}{4} - \frac{1}{2}\), dessa moneira, podemos definir ycn] como: y[n] = H(èm) em - em H(eim), quando substituimos cada volor de W por ± 174: $W(e^{i\frac{\pi}{2}}) = \frac{1 - e^{i\frac{\pi}{2}}}{1 + \frac{1}{2}e^{i\pi}} = 2 - 2i = 2\sqrt{2}e^{i\frac{\pi}{4}}, W(e^{i\frac{\pi}{4}}) = \frac{1 - e^{i\frac{\pi}{4}}}{1 + \frac{1}{2}e^{i\pi}} = 2 + 2i = 2\sqrt{2}e^{i\frac{\pi}{4}}$: y[n] = 2/2·2 = - 2/2 e^{i \(\frac{1}{4} \)}
. y[n] = 2/2 \(\frac{1}{4} \) \(\fra

6-
$$W(e^{i\omega}) = \frac{(1-ie^{i\omega})[1+1e^{i\omega}]}{1-0.8e^{i\omega}} = \frac{1+ie^{-1}e^{-i\omega}}{1-0.8e^{i\omega}} = \frac{1+ie^{-2i\omega}}{1-0.8e^{i\omega}} = \frac{1-ie^{-2i\omega}}{1-0.8e^{i\omega}} = \frac{1$$

yen = (xon*(Son+him)) *hotel, como yen = xen *hen], into

h[n] = (S[n] + h_[n]) *hoon = ho[n] + h_[n] *hoon : h[n] = &u[n] + p^-1 u[n-1]

6) Aplicando a transformado de Fourier:

a) W(eiw) =
$$\frac{\chi(e^{i\omega})}{\chi(e^{i\omega})} = \frac{1 + Be^{i\omega}}{1 - Ae^{i\omega}} \cdot [1 - Ae^{i\omega}] \cdot \chi(e^{i\omega}) = [1 + Be^{i\omega}] \cdot \chi(e^{i\omega})$$

c) Para ser coural é recossário que h[n]=0, n < 0 e essas condiços são satisfeitos, logo é um sistema cousal. Se tiver tronsformada de Fourier o sistema é estável, e como achamos a transformada, o sistema tanbém é estárol.

13- Se xCN]=
$$\frac{1}{2}$$
[n], entar $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$ [$\frac{1}{2}$]] = $\frac{1}{2}$ [$\frac{1}{2$

14. Opcar b), an que un possível
$$(A h(n)) = (A h(n))$$
